Presently, Life Cycle Assessment (LCA) of products is conducted only as per internal guidelines and database across each life cycle stage right from the sourcing of raw materials to disposal is maintained. But we are aware that conducting LCA through globally accepted software is one of the most important techniques to understand the impact of products and hence we are assessing the possibility of conducting LCA for important products in the future.
- If there are any significant social or environmental concerns and/or risks arising from production or disposal of your products / services, as identified in the Life Cycle Perspective / Assessments (LCA) or through any other means, briefly describe the same along-with action taken to mitigate the same.

Since Life cycle assessment is not conducted through globally acceptable software, no social and environmental concerns are derived out of the same.
